

TUE 2 NOV | SESSION 4 | 1.00 – 3.00
Women for Water Partnership

Oh, dear,
THERE'S A HOLE
IN THE BUCKET...

**LET'S
FIX IT!**

Lunch is
provided

Women for Water Partnership presents you with a realistic case that applies to millions of people around the world.

COME PROVIDE YOUR INPUT

Sustainable solutions to fix “the hole in the bucket” of subsistence farmers require integrated approaches and multi-stakeholder cooperation.

Reality case

In this side-event, women from Africa, Asia and Latin America & the Caribbean will present a realistic case that applies to millions of people around the world.

*There's a hole in the bucket
and it needs to be fixed*

Fixing the hole

An integrated approach to food security, sustainable water management and climate change adaptation resembles fixing a hole in a bucket. In this interactive side-event you will have the opportunity to see the challenges from multiple perspectives.

*An integrated approach is key to
putting policy into practice*

Today's mission

The practical application of policies requires different actors performing a coordinated chain of activities. Today's mission is to work together to begin to build that chain, effectively plugging the hole in our reality case.

Let's practice what we preach!
