

High-level EU Conference:

'Accelerating Concrete Actions Towards Gender Equality in Water'

13 October 2021, the **Slovenian Presidency of the Council of the European Union 2021**, the **UNESCO World Water Assessment Programme (WWAP)** and **Women for Water Partnership (WfWP)** are organizing the **High-level EU Conference 'Accelerating Concrete Actions Towards Gender Equality in Water'**.

High-level country representatives and non-state actors will convey messages supporting gender transformative strategies and actions that accelerate the pace towards **gender equality** in the water sector by 2030.

The event is inspired by the **Call for Action: Accelerating gender equality in the water domain: better data and concrete actions** led by UNESCO-WWAP with the Multi-stakeholder Coalition.

The event will address the European Member States' audience and will discuss the role of international cooperation and financing in the water and gender sector, as well as experiences from EU and non-EU countries, new plans and initiatives.
