

Women for Water Partnership participated in the Hydro-Hegemony conference (<https://www.un-ihe.org/10th-hydro-hegemony-conference>) in The Hague on 4 and 5 October. Lasha Witmer, Advocacy on behalf of WfWP presented on results from the joined research with IUCN (https://www.womenforwater.org/uploads/7/7/5/1/77516286/iucn_women_changemakers_final_web.pdf) stressing the importance and impact of looking into informal power and ensuring this is not lost when formalizing representation.

Future topics to explore: virtual water, climate impacts through water, how do we get more women into this space (this network seems to be doing ok but how the expand?)
